Welcome to the research study!

This is a survey to collect opinions from members of the public on economic policy issues. Everyone is affected by what is happening in the economy – so we want to know what you think about the issues. The real-world topics covered by the questions include climate change, twitter and artificial intelligence, so you don't need a background in economics – just give us your opinion.

The answers will be used for research purposes. Your participation in the survey is voluntary and you can stop at any stage. You may withdraw your participation at any time by sending an email with your participant ID to sarah.smith@bristol.ac.uk and we will delete all data recorded on this ID. We will ask you questions about your background, including age, ethnic origin, and gender. You can choose not to answer a specific question if you prefer not to. All data will be stored anonymously and securely at the University of Bristol, and only members of the research team will be able to access it. The legal basis for collecting and processing this information is legitimate interest (Article 6(1)(f)) of the General Data Protection Regulation 2018). We will never publish any information that could let people figure out who you are. In line with best practice for research, once our study is finished, we will securely archive your information (without any personal information) for other researchers to use in the future.

If you have any questions, please contact sarah.smith@bristol.ac.uk.

Thank you for considering your participation,

Sarah Smith and Hans H. Sievertsen
